

SHAIK MAHAMMAD SAJID

maraballikwt@gmail.com | +91 9177917648 | github.com/skmsajid | linkedin.com/in/shaik-mahammad-sajid

PROFESSIONAL SUMMARY

B.Tech Computer Science student with strong proficiency in Python and solid foundations in Data Structures, Algorithms, and problem-solving. Experienced in designing and developing scalable software applications with a focus on clean, efficient, and maintainable code. Skilled in debugging, logical implementation, and applying Object-Oriented Programming concepts. Passionate about building reliable systems and solving real-world engineering problems.

EDUCATION

- B.Tech CSE | RGUKT RK Valley, AP CGPA: 8.9 | (2023 – Present)
- Pre-University Course (PUC) | RGUKT RK Valley, AP CGPA: 9.95 | (2021 – 2023)
- Class X (SSC) | ZPHS Boys, Badvel, AP CGPA: 10.0 | (2021)

SKILLS

- Programming Languages: Python
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving
- Software Development: Application Design, Debugging, Code Optimization
- Web Technologies: HTML, React, Node.js, Express
- Databases: MySQL, MongoDB
- Tools: Git, GitHub, VS Code

PROJECTS

Friends Cart

Technologies: *HTML, CSS, JavaScript, Node.js, Express, MongoDB* | [GitHub](#) | [Live](#)

- Designed and developed a scalable full-stack application with modular backend architecture.
- Implemented efficient data handling and optimized request-response cycles for improved performance.
- Applied structured programming and debugging techniques to ensure reliability.
- Built RESTful APIs for smooth communication between frontend and backend systems.
- Focused on clean and maintainable code practices across application modules.

Fix My Village

Technologies: *React, Node.js, Express, MongoDB* | [GitHub](#) | [Live](#)

- Developed a structured issue management system with real-time status tracking and role-based workflows.
- Designed backend logic for efficient handling of multiple issue states and transitions.
- Applied Object-Oriented principles and modular design for scalability and maintainability.
- Built REST APIs and optimized database interactions for performance and reliability.
- Debugged and tested application modules to ensure correctness and robustness.

ACHIEVEMENTS

- Solved 600+ DSA problems on LeetCode using Python (Profile: [Shaik_Mahammad_Sajid](#)).
- Strong problem-solving ability demonstrated through efficient algorithm design and optimization techniques.
- 1st place, Debugging Challenge – Aadhya Technical Events.
- Runner-up, Coding Contest – Aadhya Technical Events.

CERTIFICATIONS

- Python Certification – HackerRank
- Bharat Scouts and Guides – Tritiya Sopan
